

Problem Solving Using Computer (COMP101TH)

"Computer technology is so built into our lives that it's part of the surroundings of every artist."

--Steven Levy

Welcome to the course COMP-101Th (Problem Solving Using Computer). Through this course you will get insight about the basic fundamentals of computers and how computers are organized. You will learn what kind of techniques we may apply to solve the problems through computers.

In the next half of the course, we will learn about the Python programming language. Python is an interpreted, high level and general purpose programming language designed by Guido van Rossum in 1991.

You can use Python for developing desktop GUI applications, websites and web applications. Python is commonly used in artificial intelligence projects and machine learning projects.

Course Outcomes:

- ***Students will be equipped with essential knowledge and skills required to solve problems using computers and specifically using the Python programming language.***
- ***Students will learn fundamentals of programming, problem-solving techniques and the ability to develop structured programs.***
- ***Students will get exposure to advanced Python concepts that will expand their programming capabilities.***

Course Material: All the course material will be available on Canvas.

In the beginning of the course, all the students will receive an invite on their respective e-mail IDs for joining the course.

I will use e-mail Ids that you have filled in your Admission forms. If some of you will be using any alternate e-mail ID then do update me.

For queries related to course material, the in-built messaging system of canvas is recommended.

Link to Course Material: Will be updated once the session starts

All the assignments, quizzes and tests will be maintained online on Canvas only.

Course Schedule

Total Lectures: 34 + Final Project + Lab Exercises

Class Time: as per time-table approved by the College.

Room No: 129 (1st Floor, Old Building Govt. College Hamirpur)

All the practical classes will be conducted in the Department of Computer Science Lab (Room No: 128) on 1st floor of the old building of Govt. College Hamirpur.

The schedule of lectures will be in accordance with the approved academic calendar of the college.

Lectures

	Introduction
Lecture: 1	What is Computer
Lecture: 2	Classification of Computers
Lecture: 3	Computer Generations
Lecture: 4	Basic Computer Organization
Lecture: 5	Memory Hierarchy
Lecture: 6	Registers and Cache
Lecture: 7	Primary(Main) Memory
Lecture: 8	Secondary Memory

Lecture: 9

I/O Devices

Unit Test-1

Lecture: 10

Concept of Problem Solving

Lecture: 11

Debugging, Types of Errors & Documentation

Lecture: 12

Techniques of Problem Solving (Flow Chart, Decision Table and Algorithms)

Lecture: 13

Structured Programming & Programming Methodologies

Unit Test-2

Lecture: 14

Overview of Programming

Lecture: 15

Python IDLE

Lecture: 16

Python Identifier and Keywords

Lecture: 17

Type, Input and Print Functions

Lecture: 18

Operators in Python

Lecture: 19

Python Looping Statements

Lecture: 20

Python Loop Control Statements

Lecture: 21

Python Conditional Statements

Unit Test-3

Lecture: 22

Python Lists

Lecture: 23

Python Tuples

Lecture: 24

Dictionary in Python

Lecture: 25

For Loop in Python

Lecture: 26

Python Functions

Lecture: 27

Python Modules (Date & Time Module)

Lecture: 28

Classes and Objects in Python

Lecture: 29

Inheritance in Python

Lecture: 30

Regular Expression in Python (Part-I)

Lecture: 31

Regular Expressions in Python (Part-II)

Lecture: 32

Regular Expression in Python (Part-III)

Lecture: 33

GUI Programming in Python

Lecture: 34

Python GUI Programming

Unit Test-4

Final Project
